

MUHAMMAD RIZKI ANANDA, S.KOM.

Address : Alam Raya Block A2 No. 10, Batam Center, Batam , Province Riau Island

Phone : 087748916779

Email : riakiananda19@gmail.com

SUMMARY

Fresh Graduate in Informatics from Universitas Teknologi Yogyakarta with interests in data analysis, machine learning, and data visualization. Experienced in projects involving stock price prediction, sentiment analysis, business intelligence dashboards, and frontend web development. Skilled in Python, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, Power BI, Streamlit, and React/Next.js. Able to analyze data, build visual dashboards, develop machine learning-based applications, and work responsibly by following established procedures, documentation standards, and safety guidelines.

SKILLS

Programming Languages: Python, JavaScript

Data & Machine Learning: Pandas, NumPy, Scikit-learn, TensorFlow/Keras, LSTM, GRU, BiGRU, Sentiment Analysis, TF-IDF

Data Visualization: Power BI, Microsoft Excel Pivot Table, Matplotlib, Streamlit

Database: MySQL

Web Development: HTML, CSS, React/Next.js

Tools: GitHub, Jupyter Notebook

Data Sources & Libraries: yfinance, google-play-scraper, Twitter/X crawling library

EDUCATION

Bachelor of Informatics

Sep 2022 – Aug 2026

Universitas Teknologi Yogyakarta

- GPA: 3.63/4.00
- Final Thesis: "Rancang Bangun Model Deep Learning untuk Prediksi dan Komparasi Harga Saham pada Sektor Pertambangan Indonesia"

WORK EXPERIENCE

Frontend Web Developer — Daihatsu Dealer Website

Feb 2026 – Mar 2026

React/Next.js, JavaScript, HTML, CSS

- Developed responsive frontend layouts for a Daihatsu automotive dealership website.
- Built vehicle catalog, product detail, contact, location, and testimonial sections.
- Ensured layout consistency, mobile responsiveness, and user-friendly navigation.

PROJECT EXPERIENCE

Deep Learning Stock Price Prediction Dashboard — Final Thesis Project

Jan 2026 – Jul 2026

Python, Streamlit, TensorFlow/Keras, Pandas, NumPy, Scikit-learn, yfinance

- Built a Streamlit dashboard to predict and compare Indonesian mining-sector stock prices.
- Implemented LSTM, GRU, and BiGRU models using historical stock data.
- Applied moving average feature engineering using MA9, MA21, and MA50.
- Developed stock selection, date filtering, model configuration, prediction chart, and evaluation features.
- Evaluated model performance using RMSE, MAE, and MSE.
- Integrated stock historical data and financial indicators using yfinance to support technical and fundamental analysis.

Comparative Sentiment Analysis of Tiket.com and Traveloka User Reviews <i>Python, Jupyter Notebook, Pandas, google-play-scraper, NLP, TF-IDF</i>	2025
- Collected approximately 7,200 Google Play Store reviews from Tiket.com and Traveloka. - Preprocessed Indonesian review text through cleaning, case folding, chatword handling, stopword removal, tokenization, and stemming. - Applied lexicon-based sentiment labeling to classify reviews into positive, negative, and neutral categories. - Compared sentiment distribution and user review patterns using charts, TF-IDF, word clouds, bigram, and trigram analysis.	

Oil Refinery Sentiment Analysis using Twitter/X Data <i>Python, Jupyter Notebook, Pandas, NLTK, Sastrawi, Matplotlib</i>	2025
- Collected 2,514 Twitter/X posts using oil refinery-related keywords. - Preprocessed Indonesian text data through cleaning, tokenization, stopword removal, and stemming. - Applied lexicon-based sentiment labeling to classify posts into positive, negative, and neutral categories. - Visualized sentiment distribution using bar charts to summarize public opinion.	

Pizza Sales Data Analysis Dashboard <i>Power BI, Microsoft Excel, Pivot Table, Data Visualization</i>	2025
- Built interactive pizza sales dashboards using Power BI and Microsoft Excel Pivot Tables. - Created KPI cards to summarize revenue, net revenue, quantity sold, profit, total orders, and average order value. - Analyzed sales performance by pizza category, order date, sales name, revenue, profit, and quantity sold. - Designed visual reports using bar charts, pie/donut charts, line charts, treemaps, tables, and slicers.	

AWARDS

Funded Student Creativity Program (PKM-KC) Recipient — Kementerian Pendidikan Tinggi, Sains, dan Teknologi Republik Indonesia <i>Selected as a funded recipient for HELIA, a Head-Up Display-based smart navigation assistant using LLM and NLP for motorcycle riders.</i>	2025
--	------

ORGANIZATIONAL EXPERIENCE

Himpunan Mahasiswa Informatika — Deputy of Research and Technology Division	Sep 2023 – Jul 2024
- Contributed to community service activities organized by the Informatics Student Association. - Assisted in organizing Informatics Festival programs, including online webinars, bootcamp sessions, workshops, and informatics product expo. - Supported research and technology division activities related to student development, technology learning, and event execution.	
UKM Campoer Seni — Music Division Member	Feb 2024 – 2025
Participated in music division activities and contributed as an event committee member for MTV Festival “Titik Suara” Vol. II.	

ADDITIONAL INFORMATION

Languages : Indonesian (Native), English (Beginner) Hobby : Badminton, Reading, Music
